

## Ginkgo biloba 'Saratoga'

|                          |  |
|--------------------------|--|
| Высота                   | 15 - 20 m  |
| Ширина                   | 8-10m  |
| Крона                    | broad pyramidal, light, open crown, capricious growing   |
| Кора и ветви             | twigs light brown, bark grey-brown, later deeply grooved   |
| Лист                     | in clusters of 3 - 5, variable, narrow fan-shaped and very deeply dissected, about 10 cm long, green               |
| Осенний окрас            | желтый   |
| Цветы                    | green, inconspicuous, April/May  |
| Плоды                    | none: male cultivar, fruitless cultivar  |
| Колючки/шипы             | None   |
| Ядовитость               | неядовитый, обычно   |
| Вид почвы                | any  |
| Мощение                  | устойчив к мощению   |
| Зона зимостойкости       | 5a (-28,8 до -26,1 °C)   |
| Устойчивость к ветру     | fairly to good   |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6, сустойчив к ветру  |
| Применение               | аллеи и широкие улицы, кашпо для деревьев, сады на крыше, промышленные зоны  |
| Форма                    | штамбовое дерево, разветвленное дерево, многоствольное дерево, штамбовое хвойное дерево, солитерное хвойное дерево |
| Происхождение            | Saratoga Horticultural Foundation, CA, USA, 1976   |

An American selection that initially has a narrow manner of growth. The crown ultimately takes on a pyramidal shape, but it grows slowly, particularly when young. Height 15 - 20 m, width approx. 10 m. The fan-shaped leaves and flower buds are on short shoots. The shape of the leaves of 'Saratoga' varies, but is always very deeply incised. The leaves grow in bundles of 3 - 5 and turn golden yellow in the autumn, although less spectacular than other cultivars. 'Saratoga' is a male type that is excellently suited as a street and avenue tree, thanks to its lack of fruit. Requires a site with ample light. Winter hardiness zone: 5a
