

Pinus strobus 'Fastigiata'

Высота	10 m, fast growing
Ширина	5-8m
Крона	columnar, dark, dense crown
Кора и ветви	twigs reddish brown, bark grey-green, first smooth, later deeply grooved
Лист	soft needles, in fives, 7 - 14 cm, blue-green, evergreen
Цветы	♂ in clusters b ♂ the young shoots, brown-yellow, fragrant flowers
Плоды	pendent, narrow cylindrical cones, in ones and threes, 8 - 20 cm long, 4 - 8 cm wide
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any
Мощение	неустойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	very good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	промышленные зоны
Форма	штамбовое дерево, солитерное хвойное дерево
Происхождение	Germany, before 1884

Vigorous, medium-size tree with an odd growth habit. When young the crown is almost shrub-like and somewhat irregular. Only after a few years does the tree become columnar. The young twigs are reddish brown and the mature bark is grey-green to grey-brown. The bark remains smooth for a long time and becomes deeply grooved in rectangular plates. The blue-green needles are soft and in clusters of five. During ripening, the brown cones are erect but when they are fully grown they hang down. An easy tree that is suitable for many types of soil. Also very hardy making it widely useful as a solitary, in parks or wide avenues. Very resistant to wind and not sensitive to air pollution.
