

Taxus baccata 'Fastigiata'

Высота	5 - 10 m
Ширина	1-3m
Крона	column-shaped, later broader, dark, dense crown
Кора и ветви	bark thin and brownish red, flaking, deep grooves
Лист	needles, arranged in spiral shape, dark green, 1.5 -3 cm, evergreen
Цветы	unremarkable, green, female clone
Плоды	brownish black seeds, covered 4/5 with a fleshy, red case
Колючки/шипы	None
Ядовитость	ядовитые части
Вид почвы	sandy, loamy soil, well-permeable
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше, промышленные зоны, сады в патио
Форма	солитерное хвойное дерево
Происхождение	Ireland, 1780

A column-shaped growing Taxus that remains narrow when young but later grows broader. The branches grow straight upwards at first, later bending somewhat. Short, squat lateral branches grow on the vertical branches. It is a slow grower that develops a dense, closed crown. Height 5 - 10 m, width 1.5 – 2.5 (5) m. Young twigs are green. The needles are arranged in a spiral and are very dark green. This female clone does not have very remarkable flowers. The fruit, on the other hand, is. Seeds are covered 4/5 by an oval, fleshy, red case that is 0.6 – 0.7 cm long. 'Fastigiata' bears profuse fruit. The cultivar 'Fastigiata Robusta' remains significantly narrower and has darker green needles. 'Fastigiata Aurea' takes on a column shape with yellowish green needles.
