

Acer campestre 'Elsrijk'

Высота	circa 12 m
Ширина	7-8m
Крона	closely oval to widely conical shaped, dark, dense crown
Кора и ветви	grey bark
Лист	3/5 lobes, dark green, 4 - 6 cm
Осенний окрас	желтый
Цветы	small, terminal corymbs, yellow green, May
Плоды	single-seed, winged nutlets, always paired
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	all, except dry infertile sandy soil
Мощение	устойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	very good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц, привлекает бабочек
Применение	аллеи и широкие улицы, узкие улицы, кашпо для деревьев, сады на крыше, побережье, промышленные зоны
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	C.P. Broerse, municipal nursery Amstelveen (NL), 1953

The cultivar 'Elsrijk' strongly resembles the species morphologically. As a rule the tree is slightly less tall and the leaves are a little smaller. The most striking feature is the very dense and closed crown. Therefore 'Elsrijk' is very suitable for narrow streets. The fact that the plant can withstand hard surfaces contributes positively. The plant forms a strongly branching root ball with very many hair roots. 'Elsrijk' is hardly sensitive to mildew, also a characteristic that has contributed to the fact that this tree became part of the standard assortment of avenue trees in a relatively short time. In 1953 'Elsrijk' was selected from a population of 12-year-old trees. Even then the plant caught the attention because of its narrow crown.
