

Acer davidii subsp. grosseri

Высота	circa 10 m
Ширина	6-8m
Крона	oval to round, light, open crown, capricious growing
Кора и ветви	twigs purple with grey-white longitudinal stripes
Лист	usually 3-lobed, oval triangular, circa 9 cm
Осенний окрас	оранжевый, красный
Цветы	pendent racemes, light yellow, May
Плоды	single-seeded, single-winged, light green
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	all soils
Мощение	неустойчив к мощению
Зона зимостойкости	5 (-28,8 до -23,4 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Northern and Central China
Синонимы	Acer grosseri

This Snake Bark maple forms a large multi-stemmed shrub to a small tree to a maximum height of circa 10 m. The crown is oval to round with decorative overhanging branches. The twigs usually have a slightly more greenish hue and are a little lighter than those of *A. davidii*. Therefore the stripes are less prominent. The usually 3-lobed leaves may sometimes be almost without lobes. The margin of the leaf is doubly serrated. The flowers are monoecious: female and male flowers grow on one plant. The plant has a strongly branched and compact root system. As is to be expected from a subspecies this one differs little from the species *A. davidii*. *A. davidii* subspecies *grosseri* is an ornamental plant which can be applied well in gardens and narrow streets.
