

Acer griseum

Высота	circa 10 (15) m
Ширина	6-8m
Крона	round, half-open crown, capricious growing
Кора и ветви	young twigs red-brown, older twigs and trunk peel back
Лист	trifoliate, dark green, 3 - 5 cm
Осенний окрас	оранжевый, красный
Цветы	yellow-green in clusters, May
Плоды	few, usually empty, red-coloured
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	neutral and lightly acid soil
Мощение	неустойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	Central China

Growing from a large shrub into a small to medium-sized tree, often multiple stemmed, reaching a height of circa 10 m (rarely higher). The most important feature and at the same time its greatest ornamental trait is the cinnamon-coloured bark, which, like a birch, peels back strongly. After a few years the bark colours into an intense brown-red. The leaves are trifoliate and dark green, the under surface being grey-green. In autumn the colour changes into a magnificent orange to crimson. The growth of the roots is shallow and densely rooted. A. griseum belongs to one of the nicest of all maples. It is an outstanding example of a tree that should be planted as a solitary and is suitable for both garden and park. It prefers a lightly acid soil.
