

Acer negundo 'Aureomarginatum'

Высота	6 - 10 m, fast growing
Ширина	5-8m
Крона	wide, egg-shaped, half-open crown
Кора и ветви	young twigs shiny green and pruinose
Лист	unevenly feathered, yellow-white margins, up to 20 cm, feathered leaf
Цветы	female, pendent in thick clusters, April
Плоды	falcate, winged, in racemes
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	few requirements, also in calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	moderate to poor
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, привлекает бабочек
Применение	промышленные зоны
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Dieck Baumschulen, Germany, 1885

Small to medium-sized tree (sometimes large shrub) with a wide, upright growth habit, reaching a height of circa 6 - 10 m. The differences with the other cultivars of *A. negundo* are few, but for the colour of the leaves. 'Aureomarginatum' has dark green leaves with creamy-yellow to cream coloured margins. Regularly completely creamy-yellow leaves appear on the tree too. During the summer months this “variegated” effect becomes less conspicuous. The tree grows both on wet and dry sites. It has a deep rooting main root which branches out strongly. This is an old female cultivar, dating from 1885. 'Aureomarginatum' can perfectly be applied in parks and large gardens.
