

## Acer palmatum 'Pink Filigree'

Высота	3 m
Ширина	2-3m
Крона	flat-topped spherical, mushroom-shaped, dark, dense crown, capricious growing
Кора и ветви	smooth, grey-brown
Лист	palmatifid with 5 to 7 deeply dissected leaf segments, purplish red, leaf stem red
Осенний окрас	оранжевый, красный
Цветы	red flower corymbs, May
Плоды	inconspicuous
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any, except clay, and not too dry
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	moderate to poor
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Происхождение	Fratelli Gilardelli, Agrate Brianza, Italy, ca 1994

Low, broad shrub, with widely overhanging branches if grafted onto a stem. The leaves are palmate and the leaf segments are also dissected nearly to the main veins. The growth pattern and leaf shape are typical characteristics of the “Dissectum” group, to which ‘Pink Filigree’ belongs. On emerging, the leaves are pinkish red with yellow veins. In summer the leaf is a dark, purplish red and forms an attractive background to the lighter coloured, young shoots. The autumn colour is dark orange-red. ‘Pink Filigree’ resulted from a hybridisation of *Acer palmatum* ‘Ornatum’ and ‘Stella Rossa’.
