

Acer rubrum INDIAN SUMMER ('Morgan')

Высота	15 - 20 m
Ширина	8-12m
Крона	oval to broad oval, dark, dense crown
Кора и ветви	twigs reddish brown, bark grey
Лист	palmate, lobed, bright green, leaf stem red, about 10 cm, autumn colour orange-red
Осенний окрас	оранжевый, красный
Цветы	red, in small umbels, onl male, March/April
Плоды	none: male cultivar, fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	moist, not calcareous
Мощение	устойчив к частичному мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	poor to moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	аллеи и широкие улицы
Форма	штамбовое дерево
Происхождение	Morgan Arboretum, Canada, 1972
Синонимы	Acer rubrum 'Indian Summer'

Dense, oval to wide oval crown. Vigorously growing, reaching a height of circa 20 m. Young twigs are red brown. The leaf stalk is red-brown too. The leaf is bright green and can be 10 cm. The underside of the leaf is blue-green. In comparison to other cultivars, it has a spectacular autumn colouring in orange-red hues. Juvenile trees already have this colouring. This autumn colour remains well into autumn. A male variety without any flowers or fruits. Limy soil stunts the growth. In dry soils no autumn colouring. Poor tolerance to (sea) wind. Winter hardiness zone: 4
