

Acer rubrum 'Scanlon'

Высота	10 - 12 m
Ширина	3-4m
Крона	columnar, dark, dense crown
Кора и ветви	twigs reddish brown, bark grey
Лист	palmate, lobed, glossy green, leaf stem red, about 10 cm, autumn colour orange to purple
Осенний окрас	оранжевый, фиолетовый
Цветы	red, in small umbels, March/April
Плоды	winged nut, (samara), about 2 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	moist, not calcareous
Мощение	устойчив к частичному мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	bad
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	аллеи и широкие улицы, узкие улицы
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Scanlon Nursery, Olmsted Falls, OH, USA, 1956

Medium-sized tree with a compact and narrow columnar crown. Height 10 to 12 m. Spread circa 4 m. Branching usually low. Perfect street and avenue tree. Trunk grey, young twigs are red-brown. The leaf stalk is red too. The leaf is shiny green and 10 cm. The underside is blue-green. Autumn colours in purple and orange hues. The red flowers appear before the leaves. The tree develops a sturdy main root with many fibrous rootlets. In limy and dry soil the growth is stunted and no colouring in autumn will take place. Also in heavy clay soil the growth is moderate. Poor tolerance to (sea) wind. Winter hardiness zone: 4 *Acer rubrum* 'Scanlon' forms a densely branched crown. 'Scanlon' is one of the best American selections of the red maple.
