

Acer rufinerve

Высота	9 - 12 m
Ширина	5-6m
Крона	wide vase-like shaped, light, open crown, capricious growing
Кора и ветви	green with white-grey stripes
Лист	palmate, dark green, 5 - 15 cm
Осенний окрас	желтый, красный
Цветы	yellow-green, in corymbs, April/May
Плоды	winged nutlets
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	lightly acid, permeating but not dry
Мощение	неустойчив к мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, медонос
Применение	кашпо для деревьев, небольшие сады
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Japan

A large shrub that may grow into a multi-stemmed tree. The loose habit generates an open, vase-like shaped crown. The tree can reach 10 m tall. In its original habitat in Japan it can even reach 12 m. When the tree is bare, the olive-green twigs are visible and show striking, white-grey longitudinal stripes. The green, 3-lobed, leaf varies in size from 7 to 15 cm. Across it is circa 10 cm. In autumn it turns from flaming orange-red to scarlet-red. This is a very important decorative feature. The tree forms a shallow root system which branches out profusely. A much applied maple from the group of striated maples. Though the plant prefers a warm position, scorching may occur in hot summers.
