

Carpinus turczaninowii

Высота	6 - 8 (15) m
Ширина	6-8m
Крона	round, dark, dense crown, capricious growing
Кора и ветви	Young twigs olive green, older branches and bark dark grey and smooth
Лист	broad ovate to ovate-lanceolate, 2 - 6 cm, dark green
Цветы	monoecious, April
Плоды	in separate fruiting catkins, 3 - 6 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	few soil requirements, preference for loamy ground
Мощение	устойчив к частичному мощению
Зона зимостойкости	7 (-17,7 до -12,3 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к ветру
Применение	кашпо для деревьев, сады на крыше, небольшие сады
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	Japan, Korea, northern China

Attractive, small to medium size tree with gracefully overhanging branches that form a rounded crown. The first year twigs are olive green, the older bark dark grey. The leaves are deeply veined, dark green on top and conspicuously lighter green on the underside. No remarkable autumn colours. The flower catkins are inconspicuous, but the light green fruiting catkins consist of relatively large bracts. In general, many fruiting catkins are formed. Root growth is relatively close to the surface. Has few soil requirements but flourishes best in loamy soils. The rotted leaves are good soil improvers.
