

Cercis chinensis

Высота	4 - 6 (15) m
Ширина	4-6m
Крона	broad vase-shaped, half-open crown
Кора и ветви	first-year branches (dark) brown, bark grey
Лист	round, 8 - 13 cm, glossy green
Осенний окрас	желтый
Цветы	purplish pink to light purplish red, in clusters, April/May
Плоды	brown, flat pods
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	fertile, moist but not wet, calcareous sandy or loamy soil
Влажность почвы	устойчив к сухим почвам
Мощение	неустойчив к мощению
Зона зимостойкости	6 (-23,3 до -17,8 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Central China

Medium-size to large tree in the wild, but usually a large, multi-stemmed shrub when cultivated. The trunks grow fairly steeply to form the broad, vase-shaped crown. The nearly round leaves are a glossy dark green, turning bright yellow in autumn. They feel rather thick and leathery. The flowers often appear before the leaves develop. They are purplish pink to light purplish red and stand in compact clusters. *C. chinensis* closely resembles *C. canadensis* but has thicker leaves that are always hairless, and has darker, large flowers. This warmth-loving tree prefers a loamy or fertile, moist but not too wet, calcareous soil in full sun.
