

Cornus 'Eddie's White Wonder'

Высота	8 - 10 m
Ширина	4-6m
Крона	broad ovoid, later with more or less pendulous branches, half-open crown, capricious growing
Кора и ветви	young twigs purplish brown to purple, flaking a little when mature
Лист	oval to ovate, 8 - 15 cm, glossy dark green
Осенний окрас	красный, фиолетовый
Цветы	greenish-yellow, in small heads, 4 (-6) white bracts, April/May
Плоды	none, sterile hybrid, fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	well drained soils
Мощение	неустойчив к мощению
Зона зимостойкости	7a (-17,7 до -15,0 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	сустойчив к ветру
Дерево-среда обитания для животных	сустойчив к ветру, привлекает бабочек
Применение	небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Henry M. Eddie, Vancouver, British Columbia, Canada, circa 1955
Синонимы	Cornus nuttallii 'Eddie's White Wonder'

Small tree up to about 10 m, grows vigorously when young. The tree is fairly slender initially, but older branches start to project more and eventually hang gracefully. This produces a broad, pyramidal crown. The large glossy, dark green leaves give beautiful deep red to purplish red autumn colours. Each flower head is surrounded by four to six bracts. These are white and project nearly horizontally from the flower stalk. The flower panicle has a diameter of 10 to 15 cm. 'Eddie's White Wonder' is a hybrid of *C. florida* and *C. nuttallii*, and most resembles *C. nuttallii*. However, the tree is sterile, blossoms two or three weeks later, and is hardier.
