Slow growing shrub or small, multi-stemmed tree with a somewhat irregular, round crown. Naturally has a straight main stem with a regular branching pattern. The branches may tend to droop as the tree ages, making the crown as wide as it is high. The young leaf is reddish, turning dark green in summer. Autumn colouring is deep scarlet to violet. Each head of inconspicuous flowers is surrounded by four bracts that are ruby red. Does not blossom profusely when young, but is extremely profuse when mature. The plant is shallow rooting with a fibrous root system and requires humic soil, which is not too dry.
