

Cornus officinalis 'Robin's Pride'

Высота	4 -7 m
Ширина	3-5m
Крона	oval, dark, dense crown, capricious growing
Кора и ветви	young twigs brown, bark grey-brown and olive green flaking
Лист	green
Осенний окрас	красный
Цветы	yellow, flowers in February/March
Плоды	edible fruits, red
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Влажность почвы	устойчив к сухим почвам
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево

'Robin's Pride' is a small tree that forms a continuous heart branch and eventually develops a dense, oval crown 4-7 m tall. The young twigs are brown. The older bark is grey-brown and exfoliates beautifully olive-green, which is an important ornamental value of *C. officinalis*. The leaves are dark green and turn red in autumn. Like the species, 'Robin's Pride' flowers in small umbels of pale yellow flowers in February-March. The flowers can be followed by glossy red, oval, edible fruits.

Cornus officinalis prefers clay, loamy and sandy soil, preferably calcareous. 'Robin's Pride' has the same requirements. The tree tolerates drought well. Its slender form makes it suitable for use as a street tree, also in narrower profiles. Also suitable for use as a park tree, in gardens, cemeteries, and in roof gardens. Hardiness zone 6b
