

## Crataegus laevigata 'Plena'

|                                    |  |
|------------------------------------|--|
| Высота                             | 10 m   |
| Ширина                             | 6-8m   |
| Крона                              | round, half-open crown, capricious growing                           |
| Кора и ветви                       | twigs grey, with thorns, bark brown-grey, peeling in small platelets |
| Лист                               | ovate, 3/5 lobes, very dark green, 3 - 6 cm                          |
| Цветы                              | white, blossoming dirt pink, full, in panicles, May-June             |
| Плоды                              | none, fruitless cultivar   |
| Колючки/шипы                       | Yes  |
| Ядовитость                         | неядовитый, обычно   |
| Вид почвы                          | few soil requirements, prefers fairly heavy soil                     |
| Мощение                            | неустойчив к мощению   |
| Зона зимостойкости                 | 5a (-28,8 до -26,1 °C)   |
| Устойчивость к ветру               | moderate   |
| Прочие виды устойчивости           | устойчив к морозам, зона 1 - 6                                       |
| Дерево-среда обитания для животных | устойчив к морозам, зона 1 - 6, привлекает бабочек                   |
| Применение                         | аллеи и широкие улицы, небольшие сады                                |
| Форма                              | штамбовое дерево   |
| Происхождение                      | Circa 1770   |
| Синонимы                           | Crataegus laevigata 'Alboplena'                                      |

Crataegus laevigata 'Plena' is a tree with a dense, broad, more or less rounded crown and it grows up to 10 m in height. The trunk and branches are grey. The branches bear thorns approx. 2.5 cm long and viciously sharp. The leaves are a remarkable dark green and have 3 - 5 lobes. The double flowers grow in umbels and turn from white to dirty pink. 'Plena' is sterile and therefore produces no fruit. It prefers nutritious soils, not too moist. The soil must be sufficiently compact since the tree is sensitive to wind when the root system is not well developed. Can be used in parks, streets and gardens. Winter hardiness zone: 5a
