

Cydonia oblonga 'Vranja'

Высота	3 - 5 m
Ширина	3-5m
Крона	round/spherical, dark, dense crown, capricious growing
Кора и ветви	bark black-brown, young twigs have felt-like hair
Лист	green
Осенний окрас	желтый
Цветы	whitepink, flowers in May, fragrant flowers
Плоды	edible fruits, yellow
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево, штамбовое фруктовое дерево, полуштамбовое фруктовое дерево

'Vranja' is a small tree with an almost round crown with a height of 3-5 m, in some cases higher (8 m). It is a moderately strong to vigorous grower whose stem branches grow quite horizontally. The young twigs are felt-like hairy and the old bark is black-brown. The ovoid to oval leaves are dark green and 10-12 cm in size. Flowering is around late April-early May, earlier than in the species. The flowers are white to soft pink and 4-5 cm in size. The edible fruits ripen around mid-October. These are pear-shaped, greenish-yellow to yellow and can grow larger than 10-12 cm. They are quite densely covered with felt hairs, making them soft to the touch. The productivity of 'Vranja' as a young tree is already regular and good to very good. Besides its good fruiting, this cultivar is little susceptible to mildew. However, 'Vranja' is susceptible to leaf fall disease. Hardiness zone 5a
