

Fagus sylvatica 'Dawyck Purple'

Высота	20 - 25 m
Ширина	4-5m
Крона	columnar, dark, dense crown
Кора и ветви	smooth, grey bark, soft
Лист	oval to ovate, dark purplish brown, 4 - 10 cm long
Цветы	small, inconspicuous flower catkins, May
Плоды	nuts, in cupules covered with brushy spines, 1 - 2 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	well drained, humic soil, not too wet
Мощение	неустойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	аллеи и широкие улицы, узкие улицы
Форма	штамбовое дерево, разветвленное дерево
Происхождение	Trompenburg Arboretum, Rotterdam, Netherlands, 1973

Fagus sylvatica 'Dawyck Purple' is a crossing between F. sylvatica 'Dawyck' and a red-leaved beech. It has a narrow, columnar crown and can attain a height of 25 m and a spread of 3 m. The oval to ovate leaves are deep purplish and 4 - 10 cm. As this cultivar is grafted, it retains its colour and habit well. Inflorescence is inconspicuous. In autumn the small nuts appear. Solitary preferring a well-drained, not too wet soil that is rich in humus content. Moderate wind resistance. Winter hardiness zone: 5b
