

Fagus sylvatica 'Horizontalis'

Высота	6 m
Ширина	8-10m
Крона	flatened spherical, dark, dense crown, capricious growing
Кора и ветви	grey
Лист	green
Осенний окрас	желтый
Цветы	yellowgreen, flowers in May
Плоды	brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, peaty soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, разветвленное дерево

Fagus sylvatica 'Horizontalis' has horizontally spreading branches which causes the tree to remain clearly lower than the species. Height 6 m at a maximum. As a tree the 'Horizontalis' is usually grafted on a rootstock at 2.2 m. The leaf is similar to the species. The leaf margin is distinctively undulating. The tree blooms with small, inconspicuous flower catkins. These are followed by small nuts. 'Horizontalis' is not very common and is mostly used as a small solitary tree. Prefers soil that is not too wet, well-drained and rich in humus content. Moderate wind resistance. Winter hardiness zone: 5b
