

Fagus sylvatica 'Rohan Gold'

Высота	14-16 m
Ширина	3-5m
Крона	round/spherical, dark, dense crown
Кора и ветви	grey
Лист	green, yellow, yellow
Цветы	yellowgreen, flowers in May
Плоды	brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, peaty soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Форма	штамбовое дерево

Fagus sylvatica 'Rohan Gold' grows in a compact way and has a round crown. Height circa 14 - 16 m. The leaf unfolds in bright yellow colours and turns to light green soon. This 'prevents' the tree from scorching. The leaf is oblong-ovate, moderately to deeply dissected with rounded lobes and 4 - 7 cm in size. The inconspicuous inflorescence is followed by 1- 2 cm large nutlets. This crossing between 'Rohanii' and 'Zlatia' was introduced by Arboretum Trompenburg (Rotterdam, NL) in 1973. Winter hardiness zone: 5b
