

## Fagus sylvatica 'Rohanii'

Высота	12-14 m
Ширина	8-12m
Крона	round/spherical, dark, dense crown
Кора и ветви	grey
Лист	reddisch brown, red
Цветы	yellowgreen, flowers in May
Плоды	brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, peaty soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	кашпо для деревьев, сады на крыше
Форма	штамбовое дерево, разветвленное дерево

Fagus sylvatica 'Rohanii' is a relatively small beech with a compact round crown. Due to its slow growth it does not get taller than 12 - 14 m. The dark red-brown leaf unfolds bright red. It is oblong-ovate, irregular, moderately to deeply dissected with rounded lobes and unfolds circa one week earlier than F. sylvatica. The size of the leaf is 4 - 8 cm. Inconspicuous inflorescence followed by nutlets. Park tree or solitary. Prefers not too wet, well-drained soil, rich in humus content. Moderate wind resistance. Winter hardiness zone: 5b Fagus sylvatica 'Rohanii' is a relatively small beech. The emerging leaves are a bright red and appear a week earlier than those of the common beech.
