

Fraxinus excelsior 'Diversifolia'

Высота	15 - 20 m
Ширина	10-15m
Крона	wide pyramidal, half-open crown
Кора и ветви	grey-brown bark, regularly and shallowly furrowed
Лист	simple, ovate to elliptical, dark green, circa 8 - 12 cm
Цветы	inconspicuous in lateral panicles
Плоды	very few to absent
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	fertile, moist retentive
Влажность почвы	устойчив к влажным почвам, устойчив к коротким наводнениям
Мощение	устойчив к частичному мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц
Применение	аллеи и широкие улицы, побережье, промышленные зоны
Форма	штамбовое дерево
Происхождение	England, 1789
Синонимы	Fraxinus e. 'Monophylla'

This tree has an upright, pyramidal crown, that may slightly vary from tree to tree. Mature specimen attain a height of circa 15 - 20 m. The bark is grey brown and has regular, shallow furrows. Several varieties of this tree are available. NAKB selected the 'Den Bosch'. This selection can be nursed more uniformly and has a more even growth. The dark green leaf is simple and circa 8 - 12 cm long, often with 1 - 4 lateral leaflets. Younger trees may show larger leaves. The leaf is ovate to elliptical and has a striking, circa 10 cm long, stalk. Although the tree may sometimes flower, only rarely does it bear fruits. Good street and park tree. Prefers nutritive, airy soil with a high humus content and which is very moist-retentive. Withstands urban climates and hard winds well. Intolerant to closed hard surfaces.
