

Fraxinus pennsylvanica 'Summit'

Высота	14 - 16 m
Ширина	7-9m
Крона	ovate, later round , half-open crown
Кора и ветви	grey-brown bark
Лист	odd-pinnate, 5 - 9 leaflets, green, 20 - 30 cm , feathered leaf
Осенний окрас	желтый
Цветы	yellow green, in inconspicuous lateral panicles, April
Плоды	rare
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	well-drained
Влажность почвы	устойчив к сухим почвам, устойчив к влажным почвам
Мощение	устойчив к частичному мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц
Применение	аллеи и широкие улицы, побережье
Форма	штамбовое дерево
Происхождение	America, 1957

This American selection from 1957 has an ovate crown, becoming round later. At a height of circa 15 m the spread is circa 3 m. The crown is densely closed. Older trunks are slightly furrowed and brown-grey. The young twigs, without lenticels, turn from olive-green to light brown. The 20 - 30 cm large leaf consists of 5 - 9 smaller, lanceolate, leaflets that are 10 - 15 cm and it turns yellow in autumn after which it drops rather soon. After the inconspicuous flowering fruits are seldom produced. 'Summit' is suitable as a street, avenue and park tree and tolerates dry ground, but this soil must be fertile. The tree anchors well due to its deep-going pen-root which branches out strongly.
