A cultivar with an irregularly growing open crown and a height of circa 5 m. The tree has gracefully hanging branches. If 'Emerald Cascade' is cultivated as a stem, it can be grafted both under and on top. The dark grey bark gets shallow grooves. The large, compound leaf is pinnate or twice-pinnate and has a dark green colour. It sprouts late and turns golden yellow in autumn. The separate leaflets are circa 3 cm long. It is a male variety with inconspicuous flowers in June. Applicable as a solitary in parks and gardens. Has deep rooting roots with many branches. Can be used in hard surfaces. Winter hardiness zone: 5a.
