

Hamamelis japonica 'Pendula'

Высота	3 m
Ширина	2-3m
Крона	broad weeping, light, open crown, capricious growing
Кора и ветви	brown, grey
Лист	green, yellowgreen
Осенний окрас	желтый
Цветы	light yellow, flowers in February
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, peaty soil, acid soil
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	кашпо для деревьев, небольшие сады, сады в патио
Форма	штамбовое дерево, разветвленное дерево

Broad, weeping shape with an irregular habit and very pendulous branches. This Japanese cultivar grows naturally as a shrub, attaining a height of about 1 m and a width of 3 m. If the central leader is grown with stake support, the tree can grow several metres high. The sprouting leaf is light yellow-green, turning slightly glossy dark green in summer and buttery yellow in autumn. Blossoms around February/March with pendent, light yellow flowers measuring about 2 cm. They have a slight fragrance. 'Pendula' is the only Hamamelis with a weeping growth pattern and flowers of any decorative value.
