

Ilex xaltaclerensis 'Golden King'

Высота	5-6 m
Ширина	2-3m
Крона	broad conical, dark, dense crown
Кора и ветви	brown, green
Лист	variegated, green/yellow, evergreen
Цветы	white, flowers in May
Плоды	reddish brown
Колючки/шипы	None
Ядовитость	ядовитые части
Вид почвы	sandy soil, peaty soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	7b (-14,9 до -12,3 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	сустойчив к ветру
Дерево-среда обитания для животных	сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, побережье, небольшие сады, сады в патио
Форма	штамбовое дерево

Small tree with densely branched, broad pyramidal crown to about 6 m. Young twigs are purple, mature bark is green-brown and smooth. Leaves are glossy dark green to grey-green, marked with broad yellow, later cream coloured margins. The margins are smooth or have a few small prickles. The flowers are small and fairly inconspicuous. Despite the name 'Golden King', they are female. They are followed by glossy, brownish red, drupes (commonly called 'berries') about 8 mm across. Prefers a humic, moist but well-drained soil and tolerates either acidic or calcareous soil. Also suitable for use as tall hedge.
