

Ilex aquifolium 'Atlas'

Высота	5-6 m
Ширина	3-4m
Крона	narrow conical, dark, dense crown
Кора и ветви	brown, green
Лист	evergreen
Цветы	white, flowers in May
Плоды	fruitless cultivar
Колючки/шипы	None
Ядовитость	ядовитые части
Вид почвы	loamy soil, sandy soil, peaty soil, nutrient-poor soil, acid soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	7a (-17,7 до -15,0 °C)
Устойчивость к ветру	very good
Прочие виды устойчивости	сустойчив к ветру
Применение	кашпо для деревьев, сады на крыше, побережье, небольшие сады, сады в патио
Форма	штамбовое дерево

Small tree with densely branched, compact, pyramidal crown of 5 - 6 m. Young twigs are bright green, mature bark is green-brown and smooth. The leaves are ovate to broadly elliptical and very glossy dark green. The margins are very undulate, with 2 - 6 strong, sharp prickles on each side. The flowers are small and fairly inconspicuous. This male cultivar does not bear fruit. Can be regarded as 'counterpart' of the female Alaska. Prefers a humic, moist but well-drained soil and tolerates either acidic or calcareous soil. Also suitable for use as a hedge.
