

Koelreuteria paniculata

'Fastigiata'

Высота	4 - 8 m
Ширина	1-2m
Крона	column-shaped, light, open crown
Кора и ветви	grey-brown, slightly grooved
Лист	(doubly) pinnate, dull green, 30 - 35 cm, feathered leaf
Осенний окрас	желтый, оранжевый
Цветы	yellow, in large terminal plumes, July/August
Плоды	bladder-shaped, bronze in colour, seeds black, Ø approx. 4.5 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	makes very few demands on the soil, stands up to dry conditions
Влажность почвы	устойчив к сухим почвам
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, привлекает бабочек
Применение	кашпо для деревьев
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево
Происхождение	Kew Gardens, London, England, circa 1895

Slow-growing cultivar with a remarkably narrow, column-shaped manner of growth. The large, pinnate (sometimes doubly pinnate) leaves consist of 7 - 15 leaf segments. These are approx. 7 - 10 cm long and the lobes have a serrated edge. The leaves are a bronze colour in the spring and turn yellow to orange in the autumn. The numerous small, yellow flowers are in terminal plumes approx. 30 cm long. The plumes are open and have a loose structure. After flowering, the bladder-like fruit appear, approx. 4 cm in size. They change colour from green to bronze and contain a few black seeds. The fruit remains on the tree for a long time. The 'Fastigiata' flowers are nothing like as numerous as those of the species. Should be planted in a sheltered spot since young trees can suffer from frost damage. They do, however, recover well.
