

Ligustrum japonicum

Высота	1-2 (4) m
Ширина	1-2m
Крона	vase-shaped, half-open crown
Кора и ветви	twigs grey-brown, bark grey, almost smooth
Лист	evergreen, broad ovate to elongated, 4-8 cm long, glossy dark green
Цветы	creamy white, in panicles up to 16 cm long, July-August
Плоды	berry-shaped, dull purplish black
Колючки/шипы	None
Ядовитость	ядовитые части
Вид почвы	any, if well-drained
Мощение	устойчив к мощению
Зона зимостойкости	8a (-12,2 до -9,5 °C)
Устойчивость к ветру	good, protect against dry, cold wind
Прочие виды устойчивости	сустойчив к ветру
Дерево-среда обитания для животных	сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше, побережье, небольшие сады, сады в патио
Форма	штамбовое дерево

Ligustrum japonicum is a medium-sized, well-branching, bushy shrub. Does not usually grow much taller than 2 m in culture, but can grow more than 4 m high and wide in its natural habitat. The twigs and bark are unspectacular. An important difference from the somewhat similar *L. japonicum*, *L. lucidum*, is that the young shoots of *L. japonicum* are finely hairy, whereas in *L. lucidum* they are always bare. The shiny dark green leaves are always opposite each other. The leaves are thick and leathery. In July and August, panicles appear with small creamy-white flowers, which are well-flown by bees. The tree usually flowers profusely. Flowering is often followed by dull purple-black berries, often the berries are slightly curved or flattened.

L. japonicum is a very useful evergreen shrub that does well in parks, gardens and cemeteries. Its evergreen leaves tolerate cold, drying winds poorly in winter. Preferably plant the tree in a slightly sheltered, sunny spot.
