

Liquidambar styraciflua 'Moraine'

| | |
|--------------------------|---|
| Высота | 10 - 12 m |
| Ширина | 4-6m |
| Крона | narrow pyramidal, half-open crown |
| Кора и ветви | dark grey, deeply grooved, corky fissures on older branches |
| Лист | palmately lobed, 5(-7) lobes, glossy green, 10 - 18 cm long |
| Осенний окрас | желтый, оранжевый, красный |
| Цветы | yellow-green, inconspicuous, April/May |
| Плоды | round, spiky capsule on long stem, 3 - 3.5 cm long |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | fertile, loamy soil |
| Влажность почвы | устойчив к влажным почвам |
| Мощение | устойчив к мощению |
| Зона зимостойкости | 5b (-26,0 до -23,4 °C) |
| Устойчивость к ветру | moderate |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6 |
| Применение | аллеи и широкие улицы, узкие улицы |
| Форма | штамбовое дерево |
| Происхождение | Siebenthaler Company, Dayton, OH, USA, 1980 |

Liquidambar styraciflua 'Moraine' resembles the species but grows more slowly and thus remains smaller and narrower. 'Moraine' is eminently suitable as an avenue and street tree because of the regular, slim, pyramidal shape of its crown. Height 10 - 12 m. Up to 6 m broad. Corky wings appear only on older branches. The 5-lobed (sometimes 7-lobed) leaves are larger than those of the species. The leaves are glossy green in the summer, making 'Moraine' easy to distinguish from seedlings. The autumn colour is yellow to reddish-violet. Winter hardiness zone: 5b
