

Magnolia denudata YELLOW RIVER ('Fei Huang')

| | |
|--------------------------|---|
| Высота | 6-8 m |
| Ширина | 6-8m |
| Крона | broad ovoid, dark, dense crown, capricious growing |
| Кора и ветви | brown, grey |
| Лист | green |
| Цветы | cream white, light yellow, flowers in March, fragrant flowers |
| Плоды | red, green, redgreen |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | clayed soil, loamy soil, sandy soil, peaty soil, acid soil |
| Мощение | устойчив к частичному мощению |
| Зона зимостойкости | 6 (-23,3 до -17,8 °C) |
| Устойчивость к ветру | moderate |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6 |
| Применение | аллеи и широкие улицы, небольшие сады |
| Форма | штамбовое дерево, многоствольное дерево |
| Синонимы | Magnolia denudata 'Yellow River' |

Small to medium size tree with a broad ovoid crown, up to about 8 m. This cultivar, imported from China, remains smaller than others in the species. The young twigs initially bear hairs but lose these after the first season. Untypically of the species, the large, vase-shaped flowers are cream to light yellow. The petal base is often light yellow, while the tip is cream. This gives the tree a 'yellow' appearance. The flowers have a delightful, citrus-like fragrance. The tree blossoms fairly profusely even when young, making it an attractive park tree.
