

Malus robusta 'Persicifolia'

Высота	5 m
Ширина	4-5m
Крона	broad vase-shaped, half-open crown
Кора и ветви	brown, grey
Лист	green
Цветы	white, pink, red, flowers in April, fragrant flowers
Плоды	red
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, acid soil
Мощение	устойчив к мощению
Зона зимостойкости	5 (-28,8 до -23,4 °C)
Устойчивость к ветру	good, susceptible to sea wind
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	промышленные зоны, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево

'Persicifolia' grows from a shrub form into a, usually multi-stemmed, small tree with a height of about 5 m. The crown is oval to broadly oval and semi-open. The leaves are narrow, 7-8 cm long and look somewhat like the leaves of a peach tree. In April, 'Persicifolia' flowers very profusely with single white flowers about 4 cm in size. The flower buds are pale pink, contrasting well with the flowers. Flowering is followed by fairly small (about 2 cm) ornamental apples. These are shiny red and very eye-catching and remain on the tree until February. Both the flowering and the fruits are striking, giving 'Persicifolia' double ornamental value.

Malus ×robusta 'Persicifolia' is a healthy ornamental apple. The tree is virtually soil tolerant, provided it is sufficiently permeable and sufficiently nutritious. Tolerates wind, but not sea wind. Can also be used in paving.

Malus ×robusta 'Persicifolia' is a natural hybrid, whose seed was collected by English planthunter William Purdom near Beijing. The tree was introduced by J. Veitch & Sons in 1910. Hardiness zone 5.
