

## Malus tschonoskii 'Belmonte'

Высота	10 - 12 m
Ширина	6-8m
Крона	broad pyramidal to round, half-open crown
Кора и ветви	young twigs silver grey, hairy: bark grey-brown, smooth
Лист	ovate-elliptical, bluish green, 7-12 cm
Осенний окрас	желтый, оранжевый, фиолетовый
Цветы	white, 3.5 - 4.0 cm mid-late May
Плоды	yellow-brown with red dots, 2 - 3 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	nutrient-rich, well-drained soil
Мощение	устойчив к частичному мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	good, susceptible to sea wind
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	промышленные зоны
Форма	штамбовое дерево
Происхождение	NAKB Zeewolde, the Netherlands, 1996

Medium-size tree with a broad pyramidal, eventually almost round crown, to about 12 m. The young twigs are reddish with dense, silver grey hair. The older bark is grey-brown and smooth. Only in older trees do thin plates of bark flake off at the base of the trunk. The leaf is ovate-elliptical, bluish green on top and woolly on the underside. It turns purple to orange in autumn. The white flowers open out of pink tinted buds in around mid-May. These are single and approx. 3.5 - 4 cm. The beautiful fruits are up to 3 cm and yellow-brown with red dots. They remain on the tree into October. In 1996 the NAKB (Netherlands Inspection Service for Horticulture) named a clone that was already present in Dutch nurseries and whose original tree stands in the Arboretum Belmonte at Wageningen. Slightly susceptible to scab.
