

Mespilus germanica 'Macrocarpa'

Высота	4-6 (8) m
Ширина	4-6m
Крона	flat-topped spherical, dark, dense crown, capricious growing
Кора и ветви	brown, grey
Лист	green
Осенний окрас	желтый
Цветы	white, flowers in May
Плоды	edible fruits, greenbrown, brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	5b (-26,0 до -23,4 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево

Mespilus germanica 'Macrocarpa' does not differ much from the species M. germanica, but differs from it mainly in that the fruits are larger. 'Macrocarpa' is a slow-growing tree that eventually reaches 4-6 (8) m in height. The crown is flattened spherical and somewhat irregular in shape. This erratic crown shape gives the tree a somewhat informal character. The old bark is grey. The inverted ovoid to oblong, dark green leaves are hairy. In autumn, the dark green leaves turn dark yellow to orange-yellow. White flowers, up to 5 cm in size, open in May. They are followed by up to 6 cm large edible fruits, called medlars. These are slightly more flattened at the top than in M. germanica. 'Macrophylla' usually produces many fruits. Hardiness zone 5b.
