

## Parrotia persica 'Bella'

Высота	8-10 m
Ширина	3-5m
Крона	oval, half-open crown, capricious growing
Кора и ветви	twigs olive brown, bark light gray with (purple) brown spots, smooth
Лист	oval to obovate, 7-10 cm long, glossy dark green
Осенний окрас	желтый, оранжевый, красный, фиолетовый
Цветы	red, flowers in February-march
Плоды	spiked capsule, about 1 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	loamy soil, sandy soil, peaty soil, nutrient-poor soil, acid soil
Влажность почвы	устойчив к сухим почвам, устойчив к коротким наводнениям
Мощение	неустойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Применение	кашпо для деревьев, сады на крыше
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево

'Bella' is a good-growing, small to medium-sized tree growing 8-10 m tall. Whereas the species *P. persica* tends to have an irregularly shaped crown, this is much less the case with 'Bella'. This is caused by the well-through heart branch. The twigs and older bark have the same beautiful colours as *P. persica*. The foliage turns deep red in spring. In summer it is a glossy dark green and already towards the end of the summer it starts to turn red again, before turning deep purple to purple in autumn. The flowering too is like *P. persica*. In itself not spectacular, but because the tree already flowers in February-March, i.e. before the leaves develop, the red flower bundles do stand out.
