

## Populus ×canadensis 'Ellert'

|                          |                                                   |
|--------------------------|---------------------------------------------------|
| Высота                   | 20-25 m, fast growing                             |
| Ширина                   | 12-15m                                            |
| Крона                    | oval, half-open crown                             |
| Кора и ветви             | brown, grey                                       |
| Лист                     | green                                             |
| Цветы                    | red, flowers in April                             |
| Плоды                    | fruitless cultivar                                |
| Колючки/шипы             | None                                              |
| Ядовитость               | неядовитый, обычно                                |
| Вид почвы                | clayed soil, loamy soil, sandy soil               |
| Мощение                  | устойчив к мощению                                |
| Зона зимостойкости       | 4 (-34,4 до -28,9 °C)                             |
| Устойчивость к ветру     | good                                              |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6, сустойчив к ветру |
| Применение               | аллеи и широкие улицы, побережье                  |
| Форма                    | штамбовое дерево                                  |

Populus x canadensis 'Ellert' A fast grower with a fairly straight trunk and relatively thin branches. The tree has a broad oval crown with irregular branching. Adult specimens can reach a height of 20 - 25 m. The leaves start out light green but later turn a darker shade. Bears flowers in the form of male catkins. 'Ellert' shows good resistance to rust and canker and is resistant to leaf spot disease. It is used in forestry and in coastal areas because of its good resistance to wind. Winter hardiness zone: 4
