

## Populus x canadensis 'Marilandica'

Высота	20-25 m, fast growing
Ширина	15-20m
Крона	broad conical, half-open crown
Кора и ветви	brown, grey
Лист	green
Цветы	green, flowers in April
Плоды	greenbrown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil
Мощение	устойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	bad
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, устойчив к соли для улиц
Применение	аллеи и широкие улицы
Форма	штамбовое дерево

Populus x canadensis 'Marilandica' A broad spherical to rounded crown develops from an irregular growing, rough trunk. The trunk carries many branches and characteristic heavy branches grow on the windward side. The light-green triangular leaves have an almost straight foot. The tree produces flowers in the form of female catkins. 'Marilandica' is very sensitive to leaf spot disease and fairly sensitive to rust. The tree is little sensitive to canker. This cultivar is suitable for landscape and urban planting but is very sensitive to wind. Winter hardiness zone: 4
