

Prunus 'Accolade'

Высота	6 - 8 m
Ширина	5-7m
Крона	broad vase-shaped, half-open crown
Кора и ветви	grey-brown, smooth
Лист	ovate to ovate-lanceolate, green, 6 - 12 cm, autumn colour (orange-)yellow to red
Осенний окрас	желтый, оранжевый, красный
Цветы	light pink, semi-double, buds pink, about 4 cm, April, fragrant flowers
Плоды	round, dark red, small, hardly any
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any well drained but moist soil
Мощение	неустойчив к мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	fairly
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Применение	кашпо для деревьев, сады на крыше, небольшие сады
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Knap Hill Nurseries Ltd., Woking, England, 1952

Small tree with overhanging twigs and a broad, funnel-shaped crown growing to a height of 6 - 8 m. The green, ovoid to elongated leaves taper to a long point and are 6 - 12 cm long. The leaf edge is serrated, the autumn colour (orange) yellow to red. 'Accolade' is an early-flowering cultivar with flowers in hanging bunches. In April the light pink flowers, approx. 4 cm in size and semi-double, emerge from pink flower buds. It is used as a park tree, solitary and planted in wide stretches of greenery. Prefers soils capable of providing a good deal of moisture. Prefers a light and sunny site. It is reasonably wind resistant but cannot take sea winds. Winter hardiness zone: 6a
