

Prunus cerasifera 'Nigra'

Высота	6 - 8 m
Ширина	5-7m
Крона	oval to rounded, dark, dense crown
Кора и ветви	trunk dark brown to purple-brown, twigs dark red
Лист	oval to ovoid, reddish-brown, approx. 6 - 8 cm
Цветы	pink, single, Ø approx. 2.5 cm, March/April, fragrant flowers
Плоды	seldom, dark red, Ø 2-3 cm
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	fertile and humid
Мощение	устойчив к частичному мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	fairly
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, дерево-источник питания для птиц
Применение	кашпо для деревьев, сады на крыше
Форма	штамбовое дерево, многоствольное дерево
Происхождение	North America, 1916

A remarkable tree with an oval to rounded, fairly dense crown, that often grows somewhat bent. It attains a height of approx. 6 - 8 m. The glossy bark is dark brown to purple-brown. Young twigs are dark red. The leaves are oval to ovoid and approx. 8 cm in size. They are dark reddish-brown and retain their colour until late into the autumn. The tree produces a great many pink, single flowers. They are approx. 2.5 cm in diameter and appear from late March and in April, a little before or simultaneous with the emergence of the leaves. They are seldom followed by dark red fruit, 2 - 3 cm in size. For park and garden. The tree is used on open verges as an avenue or street tree. Requires fertile and humid soil.
