

Prunus incisa 'February Pink'

Высота	3-5 m
Ширина	3-5m
Крона	broad conical, half-open crown
Кора и ветви	brown, grey
Лист	green
Осенний окрас	оранжевый, красный
Цветы	light pink, flowers in January
Плоды	purple/brown, black, little
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево

Broad upright large shrub to small tree from 3 to 5 m. Initially grows quite vertically, but goes on to develop a broad pyramidal crown. The leaves are strikingly pointed and have a doubly serrated margin. In autumn the green leaf turns orange-red. 'February Pink' blossoms very early. In non-freezing conditions the very light pink flowers already open in January. The early blossoming time means the flowers and flower buds can freeze more easily. Bears few fruits which are purplish black and round. Loves fertile, moist soil and does not tolerate drought well.
