

Prunus mume 'Beni-chi-dori'

Высота	5-7 m
Ширина	5-7m
Крона	flatened spherical, half-open crown
Кора и ветви	brown
Лист	green
Цветы	dark pink-red, flowers in February-March
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	6b (-20,5 до -17,8 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, привлекает бабочек
Применение	кашпо для деревьев, небольшие сады, сады в патио
Форма	штамбовое дерево, многоствольное дерево, штамбовое фруктовое дерево

'Beni-chi-dori' is a slow-growing sturdy shrub to small tree that can eventually reach 5-7 m in height. The crown is round to flattened spherical in later life. Fresh green leaves hang from the dark brown twigs. These are broad oval to almost round, have a long pointed tip and a double serrated leaf edge. Depending on winter cold, 'Beni-chi-dori' flowers in February-March. The single flowers, which are in pairs or alone, are 2-2.5 cm in size and consist of 6-8 petals. They are warm dark pink-red and colour very well with the dark brown twigs. 'Beni-chi-dori' is of Japanese origin. Its exact origin is not known, but the plant was imported into England before 1961. The tree is best planted in a slightly (from north and east winds) sheltered location. Hardiness zone 6b.
