

Prunus 'Okame'

Высота	3-5 (6) m
Ширина	3-5m
Крона	oval, dark, dense crown
Кора и ветви	brown, grey
Лист	green, bronze
Осенний окрас	оранжевый, красный
Цветы	reddish pink, flowers in March
Плоды	fruitless cultivar
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, calcareous soil
Мощение	неустойчив к мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	moderate
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, медонос
Применение	небольшие сады, сады в патио
Форма	штамбовое дерево, разветвленное дерево, многоствольное дерево

A bushy shrub that remains small and is sometimes cultivated on a stem. It then forms a narrow oval crown. Height 3 - 5 (6) m. The small narrow leaves have a sharply serrated edge and grow to 7 - 8 cm in size. They emerge with a bronze colour that later turns green. They become orange with red tints in the autumn. The tree produces many carmine-pink flowers from late March to mid-April. The flowers are in twos and threes and are single. They are approximately 2 - 2.5 cm in diameter. An ornamental Prunus for private and public gardens. This is a tree for a sunny sheltered site. Winter hardiness zone: 6a
