

Quercus x hispanica 'Waasland'

| | |
|--------------------------|---|
| Высота | 6-12 m |
| Ширина | 5-9m |
| Крона | flatened spherical, half-open crown |
| Кора и ветви | grey |
| Лист | evergreen |
| Цветы | light yellow, flowers in May |
| Плоды | brown |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | loamy soil, sandy soil, calcareous soil |
| Влажность почвы | устойчив к влажным почвам |
| Мощение | неустойчив к мощению |
| Зона зимостойкости | 6b (-20,5 до -17,8 °C) |
| Устойчивость к ветру | good |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц |
| Применение | промышленные зоны |
| Форма | штамбовое дерево, разветвленное дерево, многоствольное дерево |

A semi-evergreen to full evergreen medium-size tree or large shrub with a round to flat-topped spherical crown, 6 to 12 m tall. Young twigs grey-green and densely hairy. The thick bark is dark grey and deeply grooved. The elongated to narrow elliptical leaves have a variable margin. This varies from smooth-edged to rough serrated. They are dark green on top and lighter with grey hairs on the underside. During severe cold, the leaves turn brown in the winter, only falling when the new leaves emerge. A healthy, warmth-loving tree which prefers a limy soil.
