Robinia pseudoacacia 'Sandraudiga'

да

Высота	13 - 15 m
Ширина	10-15m
Крона	broad pyramidal, half-open crown
Кора и ветви	greyish brown, rough grooves, twigs have strong thorns
Лист	imparipinnate, 20 - 30 cm, 3 to 7 leaf segments, green, feathered leaf
Цветы	few, in pendulous clusters, cream♂white to light pink, approx. 2 cm, June, fragrant flowers
Плоды	rarely, reddish brown pod, 5 -10 cm long, remains on tree a long time
Колючки/шипы	Yes
Ядовитость	ядовитые части
Вид почвы	places little demands on soil, provided there is good drainage
Влажность почвы	устойчив к сухим почвам
Мощение	устойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, устойчив к соли для улиц, притягивает бабочек
Применение	аллеи и широкие улицы, промышленные зоны
Форма	штамбовое дерево
Происхождение	Lombarts, Zundert, Netherlands, 1952

A fast-growing tree with an oval to spherical crown. Branches sink down, ultimately forming a broad, pyramidal crown. The greyish brown bark is rough and deeply grooved and the twigs have strong thorns. The imparipinnate leaves consist of 3 to 7 oval, greyish green leaf segments that are 2 - 8 cm in size. The top leaf is striking, as it is clearly larger than the other leaves. Leafs out late and keeps its leaves long into the autumn. The autumn colour is yellow. Sometimes compact, pendulous clusters of creamy white to slightly pink, aromatic flowers appear in June. The flower clusters are smaller than those of the species. Older trees have more profuse flowers. Fruit is rarely seen. 'Sandraudiga' is one of the most wind-resistant cultivars of Robinia, similar in terms of growth and foliage to 'Unifoliola'. The tree has a superficial root system.
