Salix alba 'Sericea'

| Высота | 6 - 10 (12) m, fast growing |
|------------------------------------|--|
| Ширина | 6-10m |
| Крона | round, half-open crown, capricious growing |
| Кора и ветви | trunk yellowish brown to grey, deeply grooved, twigs thin |
| Лист | lanceolate, with silvery white hair on both sides, approx. 10 cm |
| Цветы | yellow and catkins, approx. 5 cm long, April |
| Плоды | catkins, approx. 8 cm long |
| Колючки/шипы | None |
| Ядовитость | неядовитый, обычно |
| Вид почвы | moist and wet, preferably calcareous |
| Влажность почвы | устойчив к влажным почвам, устойчив к коротким наводнениям, устойчив к длительным наводнениям |
| Мощение | устойчив к мощению |
| Зона зимостойкости | 4 (-34,4 до -28,9 °C) |
| Устойчивость к ветру | good |
| Прочие виды устойчивости | устойчив к морозам, зона 1 - 6, сустойчив к ветру |
| Дерево-среда обитания для животных | устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек |
| Применение | аллеи и широкие улицы |
| Форма | штамбовое дерево, многоствольное дерево |
| Происхождение | Germany, approx. 1840 |
| Синонимы | Salix alba argentea, Salix alba var. regalis |
| | |

Striking tree with a round crown and a height of 6 to 10 (12) m. The yellowish brown to grey trunk has deep, corky grooves. Young twigs are yellowish green and very bendable. The lanceolate leaves have silvery, velvety white hairs on both sides. The hairs remains on the leaves the entire summer, giving the tree a striking silvery grey colour, particularly from a distance. The leaves fall off late in the autumn, sometimes as late as the beginning of December. The yellow catkins appear at the same time as the leaves. Roots grow close to the surface, with very many root hairs. It grows in moist places and can stand temporary submersion, but also thrives in dryer places. Morphologically, this plant bears a great resemblance to S. alba.
