

Syringa josikaea

Высота	3-5 m
Ширина	3-5m
Крона	round, dark, dense crown
Кора и ветви	grey
Лист	green
Цветы	violet, pink, flowers in May-June, fragrant flowers
Плоды	capsule, brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, acid soil, all soil types
Мощение	неустойчив к мощению
Зона зимостойкости	5 (-28,8 до -23,4 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, медонос
Применение	кашпо для деревьев, сады на крыше, небольшие сады
Форма	штамбовое дерево, разветвленное дерево

The Hungarian lilac is a large shrub that can only grow into a small tree under exceptionally good conditions. Its dense crown is round and grows to about 4 m high. The young twigs are reddish-brown and covered with few lenticels. The old bark is grey and smooth. The elliptical leaves are dark green on top and distinctly lighter blue-green to light greenish grey on the underside. In May and June, *S. josikaea* blooms with more or less erect panicles of violet flowers. The individual flowers are tubular and the lobes at the top do not spread, even when the flowers unfurl. They have a sweet but weak scent. In general, *S. josikaea* does not flower extremely profusely.

Because the ornamental value of *S. josikaea* is less than for the various cultivars of *S. vulgaris*, it is ideally a plant for use in park-like settings and public spaces. It is an easy plant that grows preferably in neutral or calcareous soil.
