

Syringa reticulata 'Ivory Silk'

Высота	10 m
Ширина	4-6m
Крона	oval, half-open crown
Кора и ветви	twigs brown, flaking, bark dark grey-brown with broad horizontal lenticels
Лист	broad oval, dark green, 5 - 14 cm
Цветы	in dense panicles to approx. 30 cm, yellow-white, June/July, fragrant flowers
Плоды	dry, woody capsule, brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any, provided well-drained, tolerates limy soil
Мощение	неустойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	fairly to good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, медонос
Применение	кашпо для деревьев, сады на крыше, небольшие сады
Форма	штамбовое дерево
Происхождение	Leonard K. Slater, Agincourt, Ontario, Canada, 1973

Medium-size tree with an oval crown to approx. 10 m tall and 8 m wide. The young twigs are brown to reddish brown and flaking after several years like the bark of *Prunus serrula*. Old bark is dark grey-brown and typically covered with horizontal lenticels. The broad oval leaves are dark green. Around late June to mid-July large dense panicles of yellow-white flowers appear. The flowers have a strong fragrance reminiscent of privet. The flowers are followed by dark brown, woody capsules. Selected by Leonard Slater from a group of seedlings at Sheridan Nurseries in Canada and differs from the species by its distinctly upright growth pattern and eventually narrower crown. This lilac prefers a warm, sunny site and grows in any soil provided it is not too wet. Also tolerates lime.
