

## Syringa vulgaris 'Mme Lemoine'

Высота	2-3 m
Ширина	2-3m
Крона	round, half-open crown
Кора и ветви	flaking, brown, grey
Лист	green
Цветы	white, flowers in May, fragrant flowers
Плоды	brown
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Мощение	неустойчив к мощению
Зона зимостойкости	4 (-34,4 до -28,9 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, притягивает бабочек
Применение	кашпо для деревьев, сады на крыше, небольшие сады
Форма	штамбовое дерево, многоствольное дерево

'Mme Lemoine' is a large shrub to small tree reaching 2-3 m in height. The young twigs are bright green and the old bark is grey-brown, flaking off slightly in small patches later in life. The broadly ovoid leaves are 9-12 cm long and are light green to mid-green in colour. The flower panicles are large and quite broad. They are about 15-22 cm long and 10-14 cm wide. The individual flowers, measuring about 1.7 cm, are quite large. The flower buds are pale greenish-yellow. The opened flowers are pure white and fully filled with narrow petals, giving the blooms a finer texture. They have a strong and pleasant fragrance. The flowers open in the first half of May. 'Mme Lemoine' flowers very richly, with up to four flower panicles per branch. This enhances the impression of a full, richly flowering plant.

Syringa vulgaris grows in any nutritious and humus-rich soil. The plant prefers neutral to calcareous soil. 'Mme Lemoine' is very suitable for use in parks and gardens. The cultivar was introduced in 1890 by Victor Lemoine & Fils in Nancy, France. Hardiness zone 4.
