

Tilia heterophylla 'Prestige'

Высота	12 - 15 m
Ширина	5-6m
Крона	narrow ovoid, half-open crown
Кора и ветви	twigs red, bark dark brown, grooved
Лист	broad ovate with broad retuse base and long pointed tip, glossy dark green, 8 - 13 cm
Цветы	in corymbs 10 - 20 together, cream-coloured, July, fragrant flowers
Плоды	ovate, Ø circa 0.8 cm, brown, felt-like hairs
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any, provided well-drained
Мощение	устойчив к мощению
Зона зимостойкости	6a (-23,3 до -20,6 °C)
Устойчивость к ветру	very good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, сустойчив к ветру
Дерево-среда обитания для животных	устойчив к морозам, зона 1 - 6, сустойчив к ветру, привлекает бабочек
Применение	аллеи и широкие улицы
Форма	штамбовое дерево, многоствольное дерево
Происхождение	Willet N. Wandell, Urbana, IL, USA, 1976
Синонимы	Tilia heterophylla 'Continental Appeal'

Large tree with a distinctly more slender crown than other linden species and cultivars. The tree grows to approx. 15 m tall and 6 m wide. The young twigs are red, mature bark is dark brown and grooved. The gracefully shaped, broad ovate leaves have a retuse base and a long pointed tip. Its margin is finely and sharply serrated. The top of the leaf is glossy dark green, the underside white felt-like and light brown on young leaves. In July the fragrant, cream-coloured flowers, 10 - 20 together, appear in approx. 8 cm long corymbs. They are followed by brown, felt-like hairy ovate fruits. This cultivar was first distributed in the USA under the synonym, 'Continental Appeal'. A good avenue tree that can be used mainly in places where other lindens are too wide.
